Review 5:

Living your big juicy life is one of the best and fun to read books I have read in a very long time. It made me feel as if Michael was putting his arm around me and sharing wisdom taught to him by his own life experiences rather than most self-help guru?s.

Not only that, but it was hilarious to read. I laughed all the way through it and really saw the things that Michael went through in his life in my mind. He taught me something so pivotal to my life I can?t believe I didn?t learn it sooner and I have been sharing it every single opportunity I get.

Michael says in the book that our brains will support our beliefs, whether they are bad or good. For example, if you think you are a poor friend or unhappy, your mind will give you all kinds of evidence where that is true in your life, regardless of all the other experiences where you are been a great friend or happy. In contrast, if you think you are a great friend, or are a happy person, your mind will give you all kids of evidence that you are. Your mind doesn?t argue with you and tell you the contrary. That has been so monumental in my life, I don?t have the words to share it.

I can't wait to read more that this author has to offer
